

EARLY VOTING STARTING Oct 22ND
ELECTION DAY November 6th

CHANGE – IN YOUR CONTROL

Hello neighbors and friends. With less than 20 days left, I am reaching out again to make sure you remember why I am running for the Lee County School Board. As many might know, I'll bring 25 years of real-world experience in financial oversight, problem solving and operations from executive roles with Fortune 500 Companies. Some have asked why I believe this experience is important. To be frank, there are no leaders on the board who have managed major capital projects, who have built billion-dollar budgets from the ground up, and who have the ability to develop policies that are inspired by corporate governance and shareholder transparency. When you think about the fact that Lee County School District manages a budget that is close to \$1.5B dollars, wouldn't it make sense to have at least one person on the board that has *actually* held leadership roles for Billion Dollar businesses?

In addition to fiscal governance, you'll be able to count on me to restore the public trust by ensuring a higher level of accountability and transparency for every dollar spent in the District. This is no small feat, and it will require the District and the Board to think differently about communication and culpability.

But again, I will bring that level of expertise on Day One.

In the first year of office, I will strive to ensure that we find sustainable ways to reduce teacher turnover, and that our schools are safer through the implementation of mental health support on every campus.

Lastly, we will divert spending *from* programs that aren't helping us increase our graduation rates *to* programs that produce technical and vocational certification - boosting our graduation rates above the current 78% and filling local job opportunities with recent graduates.

This is the easiest selection on your ballot.

Vote for Dr.

Nicholas Alexander

Lee County School Board, District 6, At-Large.

Thank you for your consideration

Nicholas
